Database & Tools	PostgreSQL, Prisma, data modeling, query optimization, Git, GitHub, Vercel, Neon, Cloudinary
Programming	Java, C, C++, Python, OOP, algorithms and complexity, system design

EXPERIENCE

Freelance Full-Stack Web Engineer

Algeria / Remote | 2024 - Present

- Delivered paid web app products across grocery delivery, e-commerce, marketplaces, and B2B workflows, covering landing pages, catalogs, carts, orders, admin dashboards, authentication, and analytics.
- Designed admin systems for products, categories, brands, stock, customer orders, moderation, CRM, and dashboard control, reducing manual work for business owners.
- Modeled PostgreSQL and Prisma backends for users, roles, products, carts, orders, analytics, and secure app flows, with scalable data structures for MVP growth.
- Improved delivery quality through performance audits, SEO checks, i18n support, secure authentication, server-side validation, and measurable project success metrics.

AI Trainer, C/C++/Java

Alignerr / Labelbox | Contract

- Reviewed AI-generated C, C++, and Java code for correctness, reasoning quality, edge cases, and language-specific issues, then wrote structured evaluation reports.

SELECTED CLIENT WORK

Superette Laibi | Grocery Ordering MVP | superettelaibi.com

Bouira, Algeria | 2026

- Developed a multilingual grocery ordering platform for Bouira customers with Arabic/French i18n, landing page, 6,000+ product catalog, cart, order form, guest and registered ordering, pending-order cancellation, and JWT-based authentication.
- Optimized catalog and image workflows by reducing database reads, cutting estimated query load and database cost exposure by 95%+, and automating image sourcing to speed product entry up to 5x.
- Built admin control for products, categories, brands, stock, orders, and early CRM metrics. Dashboard analytics reported 50%+ of tracked revenue through the app and 130%+ sales growth after launch.

Rimoochat | E-commerce Store | rimoochat.com

Algeria | 2025

- Delivered a multilingual storefront for handmade kids clothing and home textiles with English/French/Arabic i18n, mobile-first UX, product storytelling, and fast purchase flow for Algerian mothers.
- Integrated Google sign-in and new-arrival notifications, helping increase sign-ups by 70%+. Reported result: store now drives 90%+ of current business income.

Unimarket | Marketplace MVP | unimarket-web.vercel.app

Algeria | 2025

- Developed a marketplace MVP for Algerian e-commerce sellers to create accounts, list products, manage local selling flows, and sell through a shared platform instead of funding separate stores.
- Implemented authentication, seller flows, listings, local payment handling, 8 core pages, and selective product-level commission logic for flexible monetization.

EDUCATION

University of Béjaïa, Abderrahmane Mira

Béjaïa, Algeria | Software Engineering

- Coursework: OOP, database systems and administration, algorithms and complexity, software engineering, system design, web development, application security, UML, operating systems, numerical analysis, calculus, algebra, Oracle SQL, and MySQL.
- Languages and tools covered: Java, C, C++, Python, JavaScript, PHP, HTML, CSS, SQL, Microsoft Excel, Word, and PowerPoint.
